

Management Software for Pet Crematoriums

For Traceability & Customer Service

What is Crem Tracker?

Crem Tracker is a software solution designed to track the progress of a pet through the cremation process.

Crem Tracker:

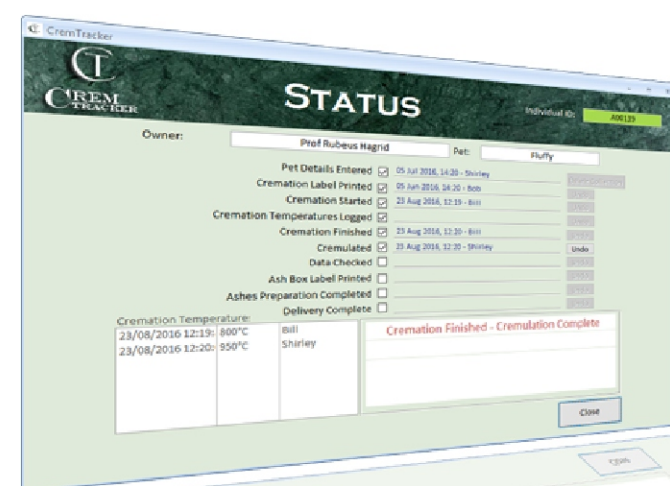

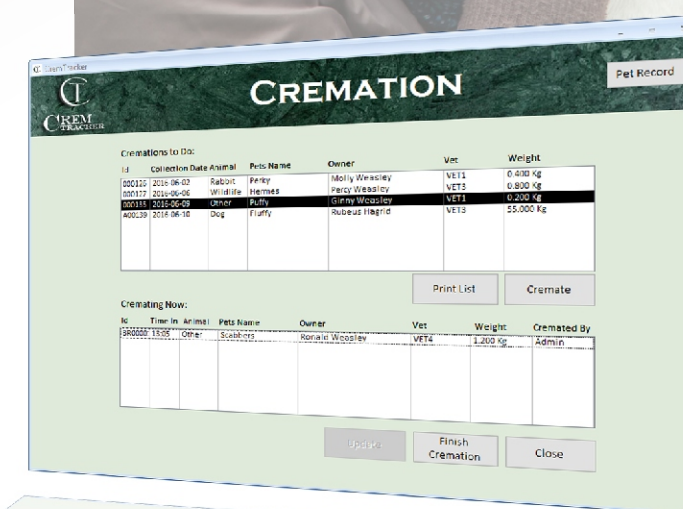

- Gives instant pet status with a powerful search feature.
- Ensures traceability and reassurance for your customers.
- Enables you to track a pet using a bar code scanner or unique ID.
- Includes crucial data checking stages to ensure pet and owner details are correct and ashes are verified.

With Crem Tracker you can:

- Log all stages of the cremation process including: pet entry, pre-cremation, cremation time (in & out), cremation temperatures, cremation chamber number, cremulation, ash preparation and delivery.
- Choose caskets, ash boxes, pawprints and any other services you sell to your customers.
- Manage pre-cremation services to ensure they are carried out beforehand.
- Track payments against an account.
- Log cremation temperatures for the Environment Agency.
- Log communal cremations.
- Instantly create ash box labels, cremation certificates, and casket labels without the need to re-enter details.
- Manage stock and the delivery of consumables to vets' practices, adjust levels when orders are placed and receive a warning when you are getting low.
- Manage your delivery schedule for multiple drivers.
- Place customers' and vets' accounts on hold, and pause the release of ashes if necessary.
- Pre-Book cremations and log pre-payments.

- Choose from a cloud-based or on-site installation.
- Rely on a security structure that gives you confidence in the protection of your customer data, where mistakes are traceable and amendable by authorised users, and where the audit trail is always maintained.

Crem Tracker will provide peace of mind through full traceability, and ensure excellent customer service for your clients at all times.

Optional Features

- A secure web portal that will allow vets and private customers to log in and find the pet's status themselves.
- An online ordering platform, allowing your vets to order bags and consumables instantly, and have them automatically scheduled for the next delivery slot.

www.cremtracker.co.uk
